## **CSS Selectors**

The Basics: Element, ID, and Class

## **Element Selector**

Select all instances of a given element

```
<div>
 You say yes
 I say no
</div>
<div>
 You say goodbye
 I say hello 
</div>
div{
 background: purple;
p {
 color: yellow;
```

You say yes
I say no
You say goodbye
I say hello

## **ID Selector**

Selects an element with a given ID. Only one per page!

```
<div>
 You say yes
 I say no
</div>
<div>
 You say goodbye
 I say hello 
</div>
div{
 background: purple;
#special {
 color: yellow;
```

You say yes

I say no

You say goodbye

I say hello

## **Class Selector**

Selects all elements with a given class

```
<div>
 You say yes
 <\mathbf{p}>\mathbf{I} say \mathbf{no}</\mathbf{p}>
</div>
<div>
 You say goodbye
 I say hello 
</div>
div{
  background: purple;
.highlight {
  background: yellow;
```
